Search-&Find Puzzle Answers	142
---------------------------------------	-----

My name is Zainab, but you can find my kawaii doodles on the internet under the handle Pic Candle. I recently quit my day job to doodle full time, because I love drawing so much. Crazy, right?!

I approach my doodles randomly without planning or thinking about the end results. I find this process to be very exciting because you never know what's going to happen. It's a surprise! I usually start with a doodle character or object that comes to mind and then keep drawing more characters and decorations, one by one, to fill up the page (see my Search-&-Find Puzzles starting on page 129). While doodling, I focus only on the character or object that I'm drawing, not the big picture.

Regarding coming up with characters, they're mainly inspired by real-life objects and simple shapes (such as a sphere, cube, cylinder, pyramid, and cone) that I have modified or combined. I also like creating make-believe characters (see Cheerful Doodle Monsters starting on page 69).

I hope this book inspires you to develop love for doodling and creating kawaii characters.

Kawaii Doodle Class is now in session!

What Is Kawaii?

You might have heard the word. You have probably seen the hashtag. You definitely know the style. But what, exactly, does *kawaii* mean?

Kawaii is a Japanese concept or idea, dating back to the 1970s, that translates closely to "cuteness" in English. In Japan, the usage of the word is quite broad and can be used to describe *anything* cute, from clothing and accessories to handwriting and art. So if you are a fan of emoji art or the style of beloved characters like Hello Kitty, Pokémon, or Pusheen the Cat, then you already know and love the kawaii style of art!

While there are many interpretations as to what constitutes the "kawaii" art aesthetic, most people can agree that kawaii art is usually composed of very simple black outlines, pastel colors, and characters or objects with a rounded, youthful appearance. Facial expressions in kawaii art are minimal and characters are frequently drawn with oversized heads and smaller bodies.

In this book, I'll show you how to draw kawaii-inspired art using the things we see every day like food, nature, makeup, and more. The great thing about kawaii culture is that it's not limited to anything, so once you start practicing, you can turn even the most common thing into something kawaii!

How to Use This Book

Kawaii Doodle Class includes five sections (Adorable Food and Drinks, Lovable Nature, Cheerful Doodle Monsters, Everyday Cute, and Charming Holiday Decorations) with more than 75 characters for you to learn how to draw.

Each character is illustrated with simple step-by-step instructions to get you started doodling. Each chapter also includes Get Inspired pages, showing you even more doodle ideas, and Doodle Party pages, where you can practice what you have learned.

At the back of the book is a section called Fun Time! with Search-&-Find Puzzles that you can also color.

Tools

You don't need to invest in many tools to get started doodling kawaii. You can use pen and paper, or you can draw digitally, or you can start with pen and paper and then scan your art in case you want to color it digitally. It's up to you!

BLACK PENS

The pens I use most are fineliner pens as they come in various tip sizes. I prefer to work with 3 tip sizes for varying line widths, though your end results can also be

achieved using only one pen. Here are the tip sizes I use:

- thin tip (for tiny details, patterns, and shadows)
- medium-size tip (for main outlining)
- thick tip (for thicker outlining outside of the main outlines—this is to make characters stand out and also for filling in large areas with black)

WHITE PENS

I use these for corrections and adding highlights.

PAPER

I'm not too picky when it comes to the paper I use for doodling. Basic sketchbooks and printer paper work just fine, but if you want to use something more professional, that's a personal preference.

MECHANICAL PENCILS

Since ink is permanent, sketching with pencil before inking is helpful when drawing complex characters. Mechanical pencils are great for drawing lines and the option of varying lead thicknesses is useful.

ERASER

A good eraser is always needed for fixing those sketching mistakes. And there are always mistakes!

RULER

Depending on how precise you want to be with your lines and such, it can't hurt to have a ruler on hand.

MARKERS AND/OR WATERCOLORS (optional)

I like using 1 or 2 colors and adding them only in some areas of my doodles, leaving other areas blank. This "semi-coloring" method works for me because it takes less time to do, and it's also easy and fun. The chances of ruining my doodles are also reduced with semi-coloring. If you want to color your doodles, semi-coloring is a good practice and less intimidating for beginners.

PHOTOSHOP (optional)

When I doodle using pen and ink and then scan the image, I use Photoshop to clean it and prepare a print-ready file. Sometimes, I also like to add colors to hand-drawn doodles digitally with Photoshop. Mixing the traditional and digital processes to create final artwork is also fun!

Tips & Tricks

Being a full-time doodle artist, I want to share the tips and tricks I have learned over time for creating kawaii characters.

- Sketch your characters with a mechanical pencil before inking them, especially more complex characters.
- When drawing square, rectangular, and pointy shapes, rounding corners and points always adds a cuter element to the character.
- Adding a simple face is always recommended, but if you don't have room, no worries. Faceless characters can also be cute!

- But if you prefer giving your characters a face, drawing their bodies or faces wider will give you more room to do this.

- Speaking of faces, go ahead and play around with the position of the face. You don't have to place the face in the center every time, or ever!

Varying the distance between a character's eyes and mouth can really change the appearance of a facial expression.

- Drawing a nose, along with eyes and a mouth, can really add "character" to your characters.

- Once you have drawn your characters, feel free to adorn them with decorations (hearts, stars, speech bubbles, etc.) and accessories (hats, sunglasses, bows, etc.) Visit the Doodle & Accessories Directory on page 12 for inspiration!

- Most importantly, there are no right or wrong ways to doodle kawaii characters. Just experiment and try to come up with your own unique style with the help of this book!
